

## Sustainability/Environmental Policy Statement

Our mission is to accelerate the building of a sustainable way of life, taking a positive, solutions-oriented approach and operating a business in a manner that meets or exceeds the ethical, legal, commercial and public expectations that society has of business.

Our Sustainability Management System encompasses our Environmental Policy, and our Corporate and social responsibility, expressing our commitment to achieving this aim. within our own organisation, across all our sites, thereby reinforcing the link between our internal operations and our external mission.

Through managing the environmental impacts of our own business, we aim to inspire our suppliers and encourage them to reduce their own adverse environmental impacts.

## Impacts

Our most significant adverse environmental impacts are:

- Emissions to atmosphere from the use of carbon based energy in offices and fuel in transport
- Consumption of resources by our use of energy, water, raw materials, office supplies and furniture
- Production of waste materials
- The environmental performance of our suppliers

## Commitment

To deliver this Policy, RTS Communications makes the following commitments:

- Comply with relevant legislative and regulatory requirements, applying the best available techniques
- Provide training for all staff and contractors so that they are familiar with our environmental systems and procedures.
- To monitor and improve our Environmental impact within our **ISO 14001:2004** management system.

As an organisation, we have an impact on the environment through our activities. To manage these seriously requires a systematic approach. We know that an Environmental Management System is not the definitive answer to all of the challenges on the path to sustainability. We are looking to expand the system to encompass our social impact. Increase awareness that everything we do impacts on the environment.
